(54) Title: INTER-SYSTEM HANDOVER

(57) Abstract

(30) Priority Data:

9816447.8

A method for performing handover of a mobile station communicating in a first call via a first network to communication in a second call via a second network, comprising: generating a request for handover; establishing the second call between the first network and the mobile station via the second network; and transferring data communication between the mobile station and the first network from the first call to the second call.
